

ScamShield AI — Official Project Proposal & System Status Report

Malaysia National Anti-Scam Intelligence & Community Defense System

Status: Production-Ready Prototype v1.2.0

Target SDGs: SDG 16 & SDG 4

1. Executive Summary

ScamShield AI is an intelligent, multi-vector scam prevention and community threat intelligence platform tailored specifically for the Malaysian digital ecosystem. The system empowers citizens to detect, verify, report, and learn about evolving digital scam tactics in real-time.

2. Focus Area & Scam Taxonomy

- **Part-Time Job & Task Scams:** Shopee/Lazada deposit task commission traps.
- **Government Impersonation & Legal Threats:** LHDN tax debt, JPJ license suspensions, PDRM money laundering threats.
- **Impossible Investment / Money Multipliers:** Guaranteed 1,000% returns, "lend RM1,000 get RM1,000,000".
- **Family Emergency & Secrecy Isolation:** "Damaged phone / new number", forbidding calls to family.
- **Courier COD Phishing:** Fake POS Malaysia delivery processing fee SMS links.
- **Quishing (QR Code Phishing):** Malicious QR code sticker overlays on physical kiosks.

3. Completed System Features & Verification Status

Feature Module	Implementation Status	Capabilities
Multi-Vector Scanner	✓ Completed	Text analysis, Screenshot OCR extraction, QR destination check, Phone/URL blacklist matching.
Impossible ROI Rules	✓ Completed	Calculates return multiplier ratios (>5x or astronomical payout) and flags deposit traps.

Feature Module	Implementation Status	Capabilities
Threat Extortion Rules	✓ Completed	Detects legal threats, arrest warrants, jail sentences, and tax fines.
Secrecy Isolation Rules	✓ Completed	Identifies secrecy commands ("don't tell anyone", "keep it secret").
Scam Intelligence Library	✓ Completed	6 category filters, daily rotating highlights, deep-dive example modals.
Spot the Scam Quiz	✓ Completed	6 realistic scenario questions with rank badges and rationale.
Admin Moderator Dashboard	✓ Completed	Review queue, verification status, blacklist management, multi-sig consensus.
Elderly Accessibility Mode	✓ Completed	High contrast, 1.4rem+ enlarged fonts, simple interface layout.

4. Admin Moderation & False Positive Governance

To ensure system integrity and prevent false alarms:

- **Multi-Signature Threshold:** Requires ≥ 3 independent user reports with screenshot proof OR 1 verified Admin approval before blacklisting.
- **Protected Whitelist:** Official government portals (.gov.my), bank hotlines, and verified merchants are protected against accidental blacklisting.
- **Dispute Resolution:** Merchant unflag appeal workflow for false positive reports.

5. Technical Architecture

Built with **React 19**, **Vite 8**, Vanilla HSL CSS design system, Lucide icons, and a client-side **Hybrid Rule Fusion Engine**.
